

The 8th International Conference of Asian Concrete Federation (ACF 2018)

SUSTAINABILITY AND INNOVATION IN CONCRETE MATERIALS AND STRUCTURES

Fuzhou, China

November 4-7, 2018

Preliminary Announcement and Call for Papers

Organized by:

Main Co-sponsors

Introduction

Concrete has been used as a building material in structure for many years and becomes the most popular structural material in the world. Asian countries apparently contribute a large volume of cement production. The demand of more sustainable and innovative concrete for better world is therefore really essential for the development of global economy and society.

The 8th International Conference of Asian Concrete Federation (ACF 2018) aims to share and build on practical sustainable and innovative concrete materials and structures development. It is a platform for concrete professional community to share advanced concrete technologies, innovations, case studies and research development as well as the importance of the production and use of concrete in a more sustainable and innovative way with scientists, researchers, government officials, regulation makers, global leaders, project owners, constructors and others.

Main Topics (but not limited to)
